

Completion engineer

Ross DK is a successful well management company. As part of our continued expansion, we are looking to hire a completion engineer for our team. Your primary focus will be to ensure that Ross DK continues to be a one-stop shop for services related to well planning, engineering, construction, and execution. Furthermore, you will work with intervention, work-overs, and plug & abandonment.

Ross DK operates primarily within Oil & Gas and Geothermal energy sectors. We are involved in a variety of projects from challenging HPHT Oil & Gas wells offshore, high inclination geothermal wells onshore to complex work-overs.

Work will primarily be within Northern Europe, and travel and rotation must be expected.

Your responsibilities:

- Design well completion programmes
- Preparation of completion guidelines
- Input to and preparation of EOWRs
- Selection of equipment
- Input to planning and budgeting
- Preparation, follow-up and execution of specific risk assessments within area of completion design
- Be focal point for Ross DKs completion design activities, keeping abreast with equipment, technologies and performance
- Operational focal point when running completion assemblies
- Support the engineering team in general
- Preparation of specific input to HSE documentation in well design projects

Your qualifications:

- Relevant education
- Minimum 5-8 years' experience in industry
- Professional completion design qualifications
- Knowledge of regulations and advisory for North Sea operations
- Fluent command of English (orally and written)

Personal skills:

- Independent, active and dynamic
- Focused on performance and deliveries
- Creative, inquisitive and responsible
- Team oriented
- See solutions where others see problems
- Proactive with regards to HSSE&Q

We look forward to hearing from you
